# 55" 4K Slim Bezel Interactive Touch Displays

Interactive whiteboard solution for meeting rooms with integrated annotation and mirroring software

## **Modern Interactive Whiteboard**

The stylish enclosure design really makes this touch screen stand out from the crowd. The bezels are so thin that the display area occupies more than 91% of the overall screen size. Designed with aluminium bezels and a moulded polymer rear, the screen is so lightweight it can even be mounted on a stud wall.

#### **4K Display**

The 4K Ultra HD display delivers incredible image quality with four times resolution higher than Full HD. Optimised for viewing distances both near and far the display allows your content to take center stage for all your visual communication.

# Introducing MEETINGPAD: The Ultimate Collaboration Tool

#### **Multi-Device Wireless Mirroring**

Wirelessly project the displays of up to four smartphones, tablets, laptops, PCs or Macs. Using mobile devices you can mirror the display in both directions, and even take control of the touch screen. Mirroring via 5GHz allows for fast response, all without the need of external wires or transmitters.

## **Flexible Working Tools**

Personalise your experience by changing the background colour of the display, as well as the colour and thickness of your drawing tools.

# **Smart Pen Stylus**

There are two stylish interactive 'Smart Pens' included. These special styluses allows you to control the display wirelessly from anywhere in the room. You can change the pen tool colour, save annotated documents, navigate through a PowerPoint presentation or website and go back to the 'MeetingPad' home screen.

#### **Easy File Sharing**

Once your device is connected you can quickly and easily share documents, videos, images and audio files stored on your smartphone, tablet, laptop or PC directly to the touch screen. You can also share files from the touch screen to your device by scanning a QR code with your mobile or tablet.

#### **Advanced Whiteboard Widgets**

The screens feature advanced widgets for the whiteboard including a calendar, timer and a calculator. For drawing more technical diagrams there are rulers and compasses available. There are tools for temporarily hiding information from viewers with our spotlight and curtain widgets.

Change Mode

# **Optional OPS Windows PC**

For seamless integration onto existing networks an OPS PC can be installed into the rear of the display, allowing for ultimate flexibility to switch between Android and Windows effortlessly.

## **Touch Screen Monitor**

As well as using the built in Android system these displays can also be used as a touch screen monitor by connecting a PC or laptop via HDMI and USB.

1. Touch USB 2. LAN 3. YPBPR In 4. AV In 5. AV Out 6. VGA Audio In 7. VGA 8. Earphones 9. SPDIF Earphone 10. HDMI In x 2 11. RS-232 12. USB x2

## **Easy Access Ports and Controls**

Quickly and conveniently connect your own laptop or devices to the screen using the front facing HDMI and Touch USB ports. There are also 3 USB ports and a USB-C port for easy access.

# **Freeze Frame Function**

While your laptop is connected you can freeze the image on screen so that you can continue to work independently on your laptop.

# **20 Touch Points**

Ideal for large group collaboration, up to twenty users can interact with the screen simultaneously when working on group projects.

# Slim Bezel

The screens feature an extremely sleek and narrow bezel meaning that the enclosure to display area ratio is very low. The front is crafted from segmented aluminium to achieve ultimate precession while the polymer rear keeps the display super slim and lightweight.

## **Etched Glass**

Improves tactility for smoother touch gestures, especially useful for multiple users. The anti-glare nano coating also diffuses external light improving optical clarity.

# **Integrated Speakers**

The screens have two integrated super slim 20W speakers for presentations that include an audio element.

20W x 2 Integrated Speak
