A powerful slot-in PC module for Touch Screens

Intel Processor

High Performance PC

Slot-In Design

Multiple OS Available

SSD Storage

4K Compatible

Enjoy the benefits of seamless integration with the Premium OPS Slot-in PC Intel® Core™ i7 that can be easily inserted and removed from the rear of your Touch Screen for the ultimate in flexible working. This powerful compact solution is able to run Windows 7, Windows 8, Windows 10 or Linux and the Intel® Core processor powers this PC to the next class of slot-in computing.

A POWERFUL OPS SOLUTION

Performance meets Power – The 8th Generation Intel® Core™ i7 Processors provides a new class of embedded computing with amazing new features. Three times more powerful than our Economical OPS this model is ideal for real-time rendering and 3D applications.

Solid-State Drive - Uses flash memory to store data, which provides better performance and reliability over an HDD as well as faster start up speed. Up to 10 times faster than a traditional hard drive.

Flexible Working – Run a wide range of different operating systems like Windows 7, Windows 8, Windows 10 or Linux to suit your way of working.

Intel 4K Graphics – Experience a remarkable 4K resolution, with faster frame rates and outstanding visual details thanks to the Intel® HD Graphics 655 card, built for compute-intensive applications.

Fully Embedded Solution – All the connectors are contained within the display including power and both video and audio signals so no external cables are required.

Quality Commitment – Built with industrial grade components you can be confident in the reliability of our product and so offer a 5 year warranty on the OPS computer.

Economical – Utilise a higher performance level while consuming less power.

Max Supported Resolution	4096 x 2160	
CPU	Intel® Core™ i7-6500U Processor	
RAM	4GB DDR3L 1333/1600MHz (Expandable up to 32GB Dual Slot)	
Architecture	64-bit	
Graphic Engine	Intel® HD Graphics 655	
Internal Storage	120GB SSD	
USB Interfaces	USB 3.0 x 3, USB 2.0 x 1	
LAN Specification	10/100/1000 Ethernet	
Wi-Fi	802.11b/g/n
